1-626-812-7537

Our Portfolio of Programs Qualifying for Financial Incentives

This workshop will provide you new content on integrated demand side management (IDSM), with ideas for a comprehensive business operation energy plan that incorporates energy efficiency, demand response, energy storage, and distributed generation. You will receive energy program solutions that can benefit your organization immediately by helping you reduce operating costs that improve your organization's bottom line and save energy.

Learn how your facility can control and manage electricity usage and demand while qualifying for financial incentives and other benefits by participating in our portfolio of programs. You will learn about program participation processes, program implementation, and the potential financial benefits of installing energy efficiency, demand response, energy storage, and distributed generation solutions.

Course Objectives:

- Cover many possible IDSM strategies primarily focused on commercial "people buildings".
- Practical exercise sessions part with real-time analysis of energy saving opportunities for participating customers.

Target Audience:

- Commercial Owners, Operators, and Energy Managers
- Industrial Owners, Operators, and Energy Managers
- Local Government Facility Managers and Energy Managers

Hosted By: SCE Government Partnerships
